

## “Fakebook” project: Generic Markscheme

Fakebook is a free application available for classroom use at [www.classtools.net](http://www.classtools.net)

Use it to create a fake social profile for a fictional or historical character, or even a concept/object!

### Markscheme

<b>Friends</b>	0-3
The Fakebook includes completed ‘blocks’ on the left-hand side (e.g. “friends”, “hobbies”, “family”). Award 1 mark for each complete block, up to a maximum of 3.	
<b>Cover Image</b>	0-2
The Fakebook includes a cover image at the top of the screen behind the main profile image. Award 2 marks only if it has an obvious connection to the character.	
<b>Profile Information</b>	0-2
The Fakebook includes profile information (birthday, family members, place of birth, job, interests...)	
<b>Posts</b>	0-2
The Fakebook “Wall” includes a series of (dated) posts which outline the key events taking place in the character’s life and career	
<b>Comments</b>	0-2
Other historically accurate characters comment on these posts offering their opinions on the events, achievements and failures being described	
<b>Video</b>	0-1
The Fakebook embeds at least one YouTube video that is relevant to the story, with a “Wall Post” from the character explaining why it’s included.	
<b>Overall Judgement</b>	0-3
Three further marks are available for the general impression created by the Fakebook – does it sound realistic / written clearly and so on?	

The image shows a screenshot of a 'Fakebook' profile for Benjamin Franklin. The cover image is a 100-dollar bill featuring Benjamin Franklin. The profile includes an 'About' section with details like 'Born: 1785', 'Status: In a Relationship with Deborah Read', and 'Home Town: Boston, Massachusetts'. It also lists 'Published Works And Awards and inventions' such as 'Poor Richard's Almanack', 'The Pennsylvania Gazette', and 'Copley medal'. The 'Wall' shows three posts: one from Daniel Bernoulli, one from Richard Feynman, and one from Batman, all commenting on Franklin's work with electricity.
